

Notes from GSA Panel Discussion

Small Business Perspective (Overlook Systems Technologies, Inc.)

Overlook Systems is a Veteran-Owned Small Business, established 1987.

Overlook's first experience with GSA was approximately 2000, on the GSA schedules for Professional Engineering Services (GS-10F-0100T) and Information Technology (GS-35F-0194K).

We had about 15 FTEs on the GPS Operations Center at Schriever AFB (under the IT schedule) from approx. 2000-2006, and about 10 FTEs on a system security architecture SETA contract with the GPS Wing at L.A. AFB (under the PES schedule) during the same timeframe.

More recently, we have placed approximately 3 FTEs on contract with NASA under the IT schedule, and approximately 30 FTEs on contract with USSTRATCOM (JFCC SPACE) in support of the Joint Navigation Warfare Center (JNWC). The JNWC contract is under the PES schedule.

Our company website (www.overlooksys.com) reflects our GSA catalogs for the two schedules. In addition to general company information (statement of capability, representations and certifications, etc) and rates for labor categories, our site reflects six special item numbers (SINS) under our Primary Engineering Discipline of Electrical for:

871-1 Strategic Planning for Technology Programs/Activities

871-2 Concept Development and Requirements Analysis

871-3 System Design, Engineering, and Integration

871-4 Test and Evaluation

871-5 Integrated Logistics Support

871-6 Acquisition and Life Cycle Management

Overlook has had a good experience with GSA. We receive multiple solicitations per week from GSA.
